

CALIFORNIA - Licensed Psychologist or Licensed Masters Level Clinician for a rapidly growing neurofeedback practice in Southern California

Healthy Within is expanding and opening new offices in Temecula California and Eastlake, a suburb in the south of San Diego.

About our Clinic

We are a cutting edge, well established, innovative Integrative Psychology practice in San Diego which utilizes neurofeedback as the primary modality. We offer thorough evaluations utilizing QEEG brain mapping and offer care plans that involve neurotherapy and comprehensive lifestyle evaluations and interventions. We have a philosophy of treating the whole person.

We serve children, teens, adults, older adults with a variety of neurotherapy.

What does a Neurofeedback Psychologist do?

- Administers Neurofeedback brain training and qEEGs to adults and children.
- Assumes responsibility for the execution of the Neurofeedback Training Plan.
- Coordinates scheduling of appointments and keeps track of sessions delivered to plan.
- Selects and adjusts neurofeedback protocols to maximize effectiveness of training.
- Tracks, charts and monitors patient's training sessions and symptomatic progress.
- Reviews patient progress and training effectiveness with the patient's caregiver or patient.
- Keeps the treatment room clean, stocked and prepared for each patient session.
- Ideally is capable of performing psychological assessments or other mental health assessments, such as for autism to bring more value to the clients.
- Marketing our practice in the community. Making collaborations.

Who can apply:

Licensed in California MA/MS/PhD in psychology, social work, counseling, marriage family therapy, rehabilitation counseling.

Previous experience in biofeedback and/or neurofeedback is highly valued for this position.

Strong marketing skills are valued too since you will be independently creating connections in the community you serve.

BCIA - Certified is a huge plus!

Must be comfortable/savvy with technology

Experience working with children

Excellent listening skills

Strong organizational and planning skills

Feels comfortable with hands on therapy

The position:

Are you enthralled with the brain?

And love neuroscience? Are you interested in health psychology?

Do you love to see actual change in your clients?

Are you empathic and warm?

Are you open to new ways of regulating the brain?

Do you like wellness coaching and improving lifestyles?

Do you prefer Integrative Positive Psychology? Prefer to work with the whole person?

Have you seen clients plateau with medications and wish there was more that could be done?

Have you felt stuck with some clients and know that it may be at the biological/organic level that they need care?

Are you technologically savvy?

Do you like forming connections in your community?

We are seeking grounded, growth oriented **Licensed Professionals** who have a deep desire to see change and progress in their patients. We are interested in professionals who will be willing to be trained and certified in neurofeedback within the first year of being with us. This will require additional training on your part in addition to the training you will receive from us.

Essential Responsibilities include:

In addition to working effectively in isolation or with very little supervision, the person hired will be trained in the basics of neurofeedback and must be competent to develop and maintain technical neurofeedback training skills, including patient preparation, signal acquisition, protocol monitoring, file record-keeping and clean-up regimens. The NFB Clinician must be able to run NFB training and QEEG acquisition sessions proficiently, as needed. You will be well trained and well supported by the head office. Following the probationary term of 6 months this position will increase to 40 hours a week and this clinician will function as the Licensed Clinical Director.

Education Required:

You have a minimum of a Master's degree and a **License to practice in California** in any of social work, psychology, neuroscience, counseling, or a mental-health related field. Prefer a Ph.D and a Psychologist.

You have a basic understanding of neuroanatomy and neurophysiology; neurofeedback and biofeedback and you are willing (Continuing education will be required) to learn new material as it is presented. You are willing to be BCIA neurofeedback certified or you are in pursuit of board certification within a 12-month time frame of being hired at our clinic. Our ideal candidate must have an interest in neuroscience and integrative psychology. Brain health and lifestyle issues are of strong interest for you.

Compensation:

\$20 - \$25 per hour for undergraduate work or wage commensurate with credentials and experience for neurofeedback technician positions. For licensed clinicians salary will be discussed based on prior knowledge and experience with neurofeedback.

Preference will be given to those already licensed in the State of California or Master's level interns as well as having education or training in Neurofeedback. Free mentoring towards board certification valued at \$2500 included in the compensation package.

Benefits include health insurance, paid sick time and worker's compensation.

Licensed Masters Clinicians or Ph D. Psychologists will receive remuneration based on experience.

Full-time. Hours fluctuate based on clients. Monday-Friday and Some Saturdays

Schedule depending on case load (scheduling flexibility an asset): 10, 4 or 8 hour shifts
