Neuro Technician needed in Florida location:

Working as an qEEG Technician you will apply electrodes to a patient's scalp, connected to the qEEG machine by wires. Observe, measure and record the electrical activity and brain wave patterns by using an encephalograph. Monitor patients during sleep cycles to diagnose sleep disorders.

We are looking for an experienced qEEG technician to record qEEG brain maps and provide neurofeedback services. Needs to be comfortable working with all age groups and familiar with mental health neuropsychological symptoms, concerns, disorders. We can train the right candidate who lacks experience within the neurofeedback field. We work with a wide variety of patients seeking collaborative mental health services by counseling and neurofeedback therapy. We need a motivated individual who is adept at maintaining accurate patient records.

Must be BCIA certified or willing to be certified in a timely manner.
