

The Mind and Motion Developmental Centers of Georgia has a position open for a Neurotherapy Department Manager available immediately.. The successful candidate must have a minimum of 3 years of experience in utilizing biofeedback, neurofeedback, and other forms for neurotherapy to be conducted mostly with children (75%) but some adults (about 25%). QEEG-D and BCIA Certification or certification eligible preferred. Managerial skills are important with knowledge of basic office software, interpersonal skills, and writing skills. Salary is commensurate with training and experience. Benefits are also available.

Mind and Motion is one the largest private integrated multidisciplinary centers specializing and treating neurodevelopmental disorders in Georgia. It operates out of an 11,000 sq ft facility with 32 employees managing and providing assessment and treatment of a variety of disorders at nearly a rate of nearly 2,000 visits per month across all services. It is located in Johns Creek, Georgia, an affluent low/crime northern suburb of Atlanta with extensive swim/tennis clubs and home associations and other recreational facilities and parks and boasts a number of the top secondary schools in the country. This location is multicultural, serving a community representative of many cultures from around the world. Thus, bilingual skills are a plus.

The practice center is actively engaged in research/professional presentations and publications to afford clinical research interests as part of ongoing clinical activities.
