

**REMOTE BIOFEEDBACK OPPORTUNITY**  
**POTS Treatment Center - Dallas, TX**

With an emphasis in biofeedback, this role facilitates, monitors and evaluates specific lifestyle and behavior changes that contribute to the improvement of health by providing group and individual counseling and instruction. This position:

- Facilitates behavior/education change groups and/or individual consulting established within theory-based practice.
- Identifies educational and behavior needs of patients by assessing patient data.
- Implements instructional objectives and counseling strategies based upon needs assessments and clinic protocol.
- Provides individual short term or long term counseling to promote or maintain behavior change.
- Tracks, evaluates and documents patient progress towards identified goals.
- Consults with medical professionals regarding patient care issues.
- Prepares reports and documentation, as assigned.
- Must be able to work flexible hours

**Required:**

- Education - Masters or higher in the area of instruction or related field.
- Specific state licensing not required as we offer educational, wellness workshops

**Preferred:**

- Minimum two (2) years of experience in Health Education or Counseling preferred.
- Biofeedback certification
- Ability to assist in the design, implementation and evaluation of appropriate educational strategies related to patient diagnosis and treatment.
- Knowledge of psychology, behavior change, organizational behavior, anatomy, and physiology
- Experience facilitating groups
- Spanish speaking is a plus
- Ability to establish rapport with patients and affect continued positive change relating to improved health and lifestyle.
- Demonstrated ability to apply effective communication skills both in individual and group environments.
- This includes demonstration of exceptional written and verbal skills.

**Notes:**

- This is a Per Diem position, schedule varies
- Willing to accommodate other work schedules
- We offer competitive compensation.
