

BCIA ACCREDITED NEUROFEEDBACK DIDACTIC TRAINING PROGRAMS

Please check with any program of interest to learn how they are presenting materials.

O (online) F (Face to Face) H (Hybrid)

The following programs are accredited to provide 36 hours of education to fulfill the didactic requirement toward BCIA Certification. Each program is responsible for the content, pricing, schedule, and all other information for their course. Please contact the individual program, not BCIA, should you need further information. Also please remember that some training programs offer more than 1 course so check carefully to be sure you purchase the BCIA didactic training based on the neurofeedback blueprint.

Many of the training programs listed below are accredited by a national professional organization such as the APA. Please visit with each provider to see what accreditations each program carries if this is important to you when making your course selection.

For questions relating to certification, contact BCIA directly. You are required to submit a program evaluation (<https://www.surveymonkey.com/r/2YXJKHN>) within 30 days of the completion of the course to get didactic credit toward certification. All information will be summarized and shared with the specific training provider with no link to a specific person.

Applied Psychophysiology Education (APED) – (O)

Cynthia Kerson, PhD
Napa, CA

NEUROFEEDBACK TECHNICIAN LEVEL APPROVED DIDACTIC TRAINING PROGRAMS

New in 2023 – BCIA has approved a revised 20-hour Neurofeedback Blueprint of Knowledge for Technicians that is specific to the scope of work a technician would be required to perform in their job. An applicant may choose to complete either the 36- hour or the new 20-hour course to fulfill the didactic requirement for certification. Please know that if your plans could include obtaining a full BCIA certification, you may wish to consider taking one of the original 36-hour courses. The following courses are approved didactic training programs for the Technician Level Certification using the 20-hour Blueprint.
