NEUROFEEDBACK ACCREDITED DIDACTIC PROGRAMS

COVID Update: Many of the programs were previously taught as in-person courses and are now teaching online. Please check with any program of interest to learn how they are presenting materials during these difficult times. The courses originally designed as distance education are marked with an asterisk.

- The following programs are accredited to provide 36 hours of education to fulfill the didactic requirement toward BCIA Certification. Each program is responsible for the content, pricing, schedule, and all other information for their course. Please contact the individual program, not BCIA, should you need further information. Also please remember that some training programs offer more than 1 course so check carefully to be sure you purchase the BCIA didactic training based on the neurofeedback blueprint.

- Many of the training programs listed below are accredited by a national professional organization such as the APA. Please visit with each provider to see what accreditations each program carries if this is important to you when making your course selection.

BCIA accredits education/training programs that meet our rigorous standards. Each provider is responsible for maintaining their own program. For more information, contact each company for specific details. For questions relating to certification, contact BCIA directly. You are required to submit a program evaluation (https://www.surveymonkey.com/r/2YXJKHN) within 30 days of the completion of the course in order to get didactic credit toward certification. All information will be summarized and shared with the specific training provider with no link to a specific person.
